## Reynolds' Review

OUR NICKEL WEALTH.

There is now growing up a strong

agitation in favor of putting a strong

high spot of nickel on nickel ore and

"nickel" which is a small reduction of

the rough nickel ore as it is mined. It

is well known that near Sault Ste. Marie,

in this Province, one of the most extensive

and valuable nickel ore beds of the

world exists. Indeed it is only in New

Caledonia, under French dominion, that

any other bed of much importance has

ever been found. Nearly all our nickel

has been exported from Canada in the

raw state and nearly all the profits of

refining and working it are reaped in

the United States. In fact, our nickel

ore is almost to be considered as a

model ore in the world, and it is

not at all to be compared with the

inferior ore of the United States.

It may appear a little weak

for an anti-protection government

to demand that the nickel ore be

refined in Canada, but the best interests of

the country are served by the

refining of the nickel ore in Canada.

Why should not Canadian capital, labor

and skill be employed in the refining

and manufacturing of our own natural

wealth? Why should our nickel ore be

exported to the United States and

then to Canada? The question was

never so important to be fore.

The demand for nickel is constantly

increasing. During the last few years

the demand for nickel has increased

to such an extent that it is now

one of the most important of the

metals of the world. It is used in

the manufacture of alloys, and in

the manufacture of machinery.

It is also used in the manufacture

of electrical apparatus, and in the

manufacture of chemical apparatus.

It is also used in the manufacture

of glass, and in the manufacture

of paper, and in the manufacture

of many other articles.

It is also used in the manufacture

of many other articles.

It is also used in the manufacture

of many other articles.
